H2O for Life offers a service-learning program designed to engage, educate, and inspire youth to become global citizens.
Inspiring Youth To Solve The Global Water Crisis
Ushering in a New Decade

As we embark upon an exciting new decade, it’s important to remember how far we’ve come since our founding in 2007.

In that time, nearly 1 million students from H2O for Life schools have supported water, sanitation, and hygiene education projects (WASH) for partner schools around the world.

While those numbers are indeed impressive, it’s good to remember the less measurable, though equally important stories of personal growth that happened along the way.

Our youth are funding life-saving WASH projects in partner schools around the world, and in the process, they are solidifying a lifelong commitment to helping others in need. The act of taking action and giving back to the world can be a profoundly empowering experience for a young person.

That’s what makes our model stand apart from the many wonderful groups working to help solve the global water crisis; we’re not only fighting the global water crisis...we’re getting our youth involved in the effort.

Nothing gives me greater hope than igniting a passion in young people to help make the world a better place. Doing so supports a future filled with concerned citizens.

We’re grateful for your support.

“Wheresoever you go, go with all your heart.”

~ CONFUCIOUS
A CALL TO SERVICE

“We don’t have time to wait around for someone else to help. Not when...844 MILLION people around the world do not have access to clean water. Not when...women and girls miss opportunities to go to work and school because their days are consumed by hours of walking to fetch water. Not when...every 2 minutes—a child dies from a preventable water-related disease. We ALL should feel a sense of urgency and call to help now.”

~ Kayla & Brycelyn
8th Graders, Varsity Lakes Middle School, Florida
LIFELONG BENEFITS

“Our studies demonstrate that if you engage in helping activities as a teen, you will still be reaping health benefits 60-70 years later... Even more remarkable, giving is linked to traits such as social competence, empathy and positive emotion that undergird a successful life.”

~ Stephen Post and Jill Neimark in “Why Good Things Happen to Good People”

Project Manager
H2O for Life has created a variety of engaging lesson plans for students at every grade level. Our educational materials provide units and lessons to help students gain awareness for water in their community, realize their impact, learn how to advocate for change, and impact the world through their service-learning projects.

We’ve done the work vetting project implementers around the world so H2O for Life schools don’t have to. That means that teachers can focus on teaching and engaging students in service-learning projects and fundraising efforts without worrying whether their funds will be used as intended. Our goal is to make the process easy and safe for teachers.

Once teachers and students have chosen a global project they’d like to support on our website, we make it easy for them to create a fundraiser and start raising money for their partner school. Our proprietary platform allows teachers to post updates, track their progress, view donor details, and allow students to create personal fundraisers.

Taking on a service-learning project for the first time can be scary and overwhelming for teachers even when they’ve got all the resources to make it happen. That’s why we’ve invested in a full-time School Outreach Coordinator to help teachers one-on-one with any questions they might have. Mitchell LeGrand is only a phone call or email away.
H2O for Life is focused on educating youth to become civically engaged leaders through the lens of solving the water crisis. We use meaningful service-learning experiences and leadership opportunities to activate students to use their voices and take action to create positive change. Students who participate in our global school partner program impact their peers in the developing world by raising funds to provide water, sanitation, and hygiene education.
